**Question:**

In a  $\triangle ABC$ ,  $\angle C = 3\angle B = 2(\angle A + \angle B)$ . Find the three angles.

**Solution:**

In a  $\triangle ABC$ , the sum of interior angles is equal to 180.

$$\angle A + \angle B + \angle C = 180 \quad (1)$$

Also,

$$\angle C - 3\angle B = 0 \quad (2)$$

$$2\angle A - \angle B = 0 \quad (3)$$

On putting the above equations in a matrix we will get,

$$\begin{pmatrix} 1 & 1 & 1 \\ 0 & -3 & 1 \\ 2 & -1 & 0 \end{pmatrix} \begin{pmatrix} \angle A \\ \angle B \\ \angle C \end{pmatrix} = \begin{pmatrix} 180 \\ 0 \\ 0 \end{pmatrix} \quad (4)$$

The augmented matrix is given by,

$$\left( \begin{array}{ccc|c} 1 & 1 & 1 & 180 \\ 0 & -3 & 1 & 0 \\ 2 & -1 & 0 & 0 \end{array} \right) \quad (5)$$

$$R_3 \rightarrow R_3 - 2R_1 \Rightarrow \left( \begin{array}{ccc|c} 1 & 1 & 1 & 180 \\ 0 & -3 & 1 & 0 \\ 0 & -3 & -2 & -360 \end{array} \right) \quad (6)$$

$$R_2 \rightarrow -1/3R_2 \Rightarrow \left( \begin{array}{ccc|c} 1 & 1 & 1 & 180 \\ 0 & 1 & -1/3 & 0 \\ 0 & -3 & -2 & -360 \end{array} \right) \quad (7)$$

$$R_1 \rightarrow R_1 - R_2 \text{ and } R_3 \rightarrow R_3 + 3R_2 \Rightarrow \left( \begin{array}{ccc|c} 1 & 0 & 4/3 & 180 \\ 0 & 1 & -1/3 & 0 \\ 0 & 0 & -3 & -360 \end{array} \right) \quad (8)$$

$$R_3 \rightarrow -1/3R_3 \Rightarrow \left( \begin{array}{ccc|c} 1 & 0 & 4/3 & 180 \\ 0 & 1 & -1/3 & 0 \\ 0 & 0 & 1 & 120 \end{array} \right) \quad (9)$$

$$R_1 \rightarrow R_1 - 4/3R_3 \text{ and } R_2 \rightarrow R_2 + 1/3R_3 \implies \left( \begin{array}{ccc|c} 1 & 0 & 0 & 20 \\ 0 & 1 & 0 & 40 \\ 0 & 0 & 1 & 120 \end{array} \right) \quad (10)$$

$$\implies \begin{pmatrix} \angle A \\ \angle B \\ \angle C \end{pmatrix} = \begin{pmatrix} 20 \\ 40 \\ 120 \end{pmatrix} \quad (11)$$

Therefore,

$$\angle A = 20^\circ \quad \angle B = 40^\circ$$

$$\angle C = 120^\circ$$
